We Own & Maintain, You Drive.

Also known as a 'Fully Maintained Operating Lease'. You simply choose & drive the vehicle of choice - we take care of the rest.

The key benefits of this solution:

Owning a depreciating asset with unknown future costs and resale values doesn't always make commercial sense. If you're looking for the easiest and most cost effective way of running a vehicle or entire fleet, we believe this is it. We purchase the asset of your choice, passing on our national procurement discounts. We provide a full scheduled service & maintenance plan including tyres and roll this into our industry leading complete fleet management system which includes our own telematics platform for safer driving on NZ roads.

- ▶ **No upfront costs.** Simply a set, fixed monthly cost per vehicle - includes all maintenance and agreed tyre allocation, locked in for the term and km's to match your fleet requirements. If the usage changes, no problem. Our fleet experts will suggest a lease variation to best suit the changing needs of your fleet, avoiding excess km charges or returning under-utilised vehicles.
- ▶ **Complete Fleet Management.** You just drive. Our telematics technology connects us to your fleet. We'll manage all your service bookings, purchase your road user charges, tyres, sort your windscreen repairs or replacements, supply you with our complementary fuel cards (we don't charge fees and we pass on our significant fuel discounts), manage accidents from incident to completion. We're here to help 24/7.
- ▶ **Simply return the vehicle at the end of the lease** - no commercial implications around its future value & no need to try to sell it. Love your lease vehicle and want to own it at the end of the term? We can also help with that.
- ▶ **Worried about refurbishment charges?** No worries! Yoogo Fleet doesn't charge for any fair wear and tear. And we discount any billable costs by 30% (excluding WOF items), unlike our competitors!
- ▶ **Concerned about Health & Safety requirements?** Know and understand the latest legislation and the potential implications for Directors and Managers? All of our Fully Maintained lease vehicles are fitted with Yoogo Fleet Telematics for transparency & improved safety. We'll help guide you through the set up & provide reporting for better fleet management.
- ▶ **Looking for sustainable options.** If your future is Green or you are looking to reduce your carbon footprint and are wondering how to transition some or all of your fleet to EVs or other Green Fleet options with guidance and modelling then Yoogo's fleet experts are good to go on all the options.

Kelvin James | General Manager  027 298 1285

“

The Yoogo Fleet team remind drivers when WOF's and vehicle services are due, even going the extra mile to book vehicles in with preferred service agents.
